Grigoris Giapantzis

Full Stack & Platform Engineer

Thessaloniki, Greece | +30 6908286222 | giapa@protonmail.com
GitHub: github.com/Giapa | LinkedIn: Giapa

Professional Summary

Full stack and platform engineer with 5+ years of production experience in Vue.js and TypeScript. One year leading three developers and two QA engineers across delivery, production support and product/design coordination. Personal-project experience with large language models (LLMs), retrieval-augmented generation (RAG) and LangChain; currently developing a chatbot.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL
Backend & data: Node.js, Fastify, REST APIs, PostgreSQL; FastAPI in personal projects
Frontend: Vue.js, Nuxt, Vuex, Pinia, HTML, CSS/SCSS, TailwindCSS, Electron
Delivery: Docker, continuous integration/continuous delivery (CI/CD), GitLab CI, GitHub Actions, Git
Cloud (personal projects): AWS, Google Cloud, Firebase Hosting, Netlify, Cloudflare, Grafana
Testing: Playwright, Cypress, Selenium, Jest, Vitest
AI coding tools: Claude Code, GitHub Copilot, Codex; model APIs and coding agents

Professional Experience

Allwyn | June 2021 - Present

Front-End Developer & Platform Engineer

Vue.js, TypeScript, JavaScript, TailwindCSS, Electron, GitLab CI

- Helped reduce application bundle size by **80% (to one-fifth)** through architectural changes.
- Develop and maintain Vue.js and TypeScript applications for Self Service Betting Terminals (SSBTs) used across **3,380 Allwyn stores** in Greece, alongside online web games.
- Lead **three developers and two QA engineers**; break down work, coordinate with product and design, make architectural decisions, review code and mentor developers.
- Handle production issues and own delivery from implementation to production within Agile/Scrum teams.
- Delivered a nationwide application redesign; led the Group Play project and contributed to every major game release.
- Integrate REST APIs, implement automated tests and build responsive web and mobile interfaces.

Projects

Orkosys | Full-Stack Engineer | November 2025 - June 2026

Vue.js, TypeScript, Fastify, PostgreSQL, GitHub Actions

- Designed and implemented a digital inheritance application with Vue.js and TypeScript, a Fastify REST API and PostgreSQL; led frontend architecture, state management and user experience implementation.
- Applied clean architecture, domain-driven design and dependency injection across frontend and backend layers.

Education

BSc in Computer Science | International Hellenic University | Graduated 2024

Community and Knowledge Sharing

IEEE IHU Student Branch: member since 2017; board member, 2018-2020.
Speaker, Arduino Day at International Hellenic University, November 2019.
Organized technical talks and workshops. Volunteer at FOSDEM in Brussels.
